

Office of Research
Awareness Series:
**Updates to NSF
Proposal Formats**

Updates by NSF

NSF PAPPG 20-1

What: Proposal and award process and updates for NSF assistance programs, and NSF's implementation of the Uniform Guidance (2 CFR 200).

When: Effective for proposals submitted or due, and awards, on or after June 1, 2020.

Note: Requirement for NSF-approved formats for Biosketch and C&P was delayed until on or after October 5, 2020

NSF 20-1 Significant Changes

Current & Pending Support

Disclosures now included

Financial Support

- Sponsored awards held at the University, held at another institution/entity, or held as an individual that support an investigator's research efforts.
- Start-up packages from entities other than the University.
- *Note:* Investigators do not need to disclose University start-up packages or gifts.

In-kind Contributions

- Non-monetary resources that are uniquely available to key personnel.
- Examples include office/laboratory space, equipment, supplies, employees, students.
- Location of in-kind disclosures is dependent on two factors.

NSF 20-1 Significant Changes

Current & Pending Support: In-kind Contributions

- **In-kind contributions for the project being proposed to NSF** should be included in the Facilities, Equipment and Other Resources section of the proposal and do not need to be included in the C&P form. This includes in-kind contributions with and without an associated time commitment.
- **In-kind contributions that are not intended for use on the project being proposed to NSF** need to be reported ***only if*** there is an associated time commitment. This should be reported on the current and pending support form.

NSF 20-1 Significant Changes

Current & Pending Support

NSF requires the Current and Pending Support form to be completed in an NSF approved format. Two options are available:

- PDF fillable Current and Pending Support form
- SciENcv will produce an NSF-compliant Current and Pending Support form

Additional information can be found on the [NSF-Approved Formats for Current and Pending Support](#) web page.

NSF 20-1 Significant Changes

Biographical Sketch

Must now include in reverse chronological order by start date:

- All academic, professional, or institutional appointment held by investigators whether current or previously held.
- Includes domestic or foreign, paid or unpaid, or full/part-time/voluntary.
- Titled academic, professional, or institutional appointments, including adjunct, visiting, or honorary must be disclosed.

Now permits use of “*et al*” for publication citations in the Products section if listing multiple authors makes it difficult to fit the information into the allotted space.

NSF 20-1 Significant Changes

Biographical Sketch

NSF requires the Biographical Sketch form to be completed in an NSF approved format. Two options are available:

- PDF fillable Biographical Sketch form
- SciENcv will produce an NSF-compliant Biographical Sketch form

Additional information can be found on the [NSF-Approved Formats for Biographical Sketch](#) web page.

NSF 20-1 Significant Changes

Rapid Response Research (RAPID) Proposal and Early-Concept Grants for Exploratory Research (EAGER) Proposals:

- Have been supplemented with language which clarifies how RAPID and EAGER proposals may not be used.
- New requirement that email documentation from a cognizant NSF Program Officer approving submission of a RAPID or EAGER be uploaded to the proposal also has been added.

NSF 20-1 Clarifications and Other Changes

Project Description

- Revised to remove the requirement for the Project Description to contain, as a separate section within the narrative, a section labeled "Intellectual Merit"

Biosketch, Synergistic Activities

- Updated to clarify that synergistic activities should be specific and must not include multiple examples to further describe the activity.

Budget and Budget Justification

- Clarification that “publication” line item of the proposal budget also may be used to request funding for data deposit and data curation costs.
- Participant Support updated to state that conference costs that are secured through a service agreement (e.g., venue rental fees, catering costs, etc.) should be budgeted as “Other Direct Costs.”

Submission of a collaborative proposal from multiple organizations

- Updated to reflect that for these proposals, the project title must begin with the words "Collaborative Research"

NSF 20-1 Clarifications and Other Changes - Cont'd

Changes in Person-Months Devoted to the Project and Withdrawal of PI/PD or co-PI/co-PD

- Updated to reflect that such requests must be submitted at least 30 days before the proposed change, or as soon as practicable after the prospective change/ withdrawal is known.

Conference Proposals

- Must include information on the complaint resolution process in the policy or code-of-conduct disseminated to conference participants.
- Include a plan for recruitment of and support for, speakers and other attendees that includes participation of underrepresented groups.
- Include a description of plans to identify resources for child and other types of family care.

List of Suggested Reviewers or Reviewers Not to Include

- Updated to remove the requirement to indicate why the proposer prefers someone not review their proposal.

Research Performance Progress Report (RPPR)

Research Performance Progress Report (RPPR)

Submissions with 'Active' Other Support Changes

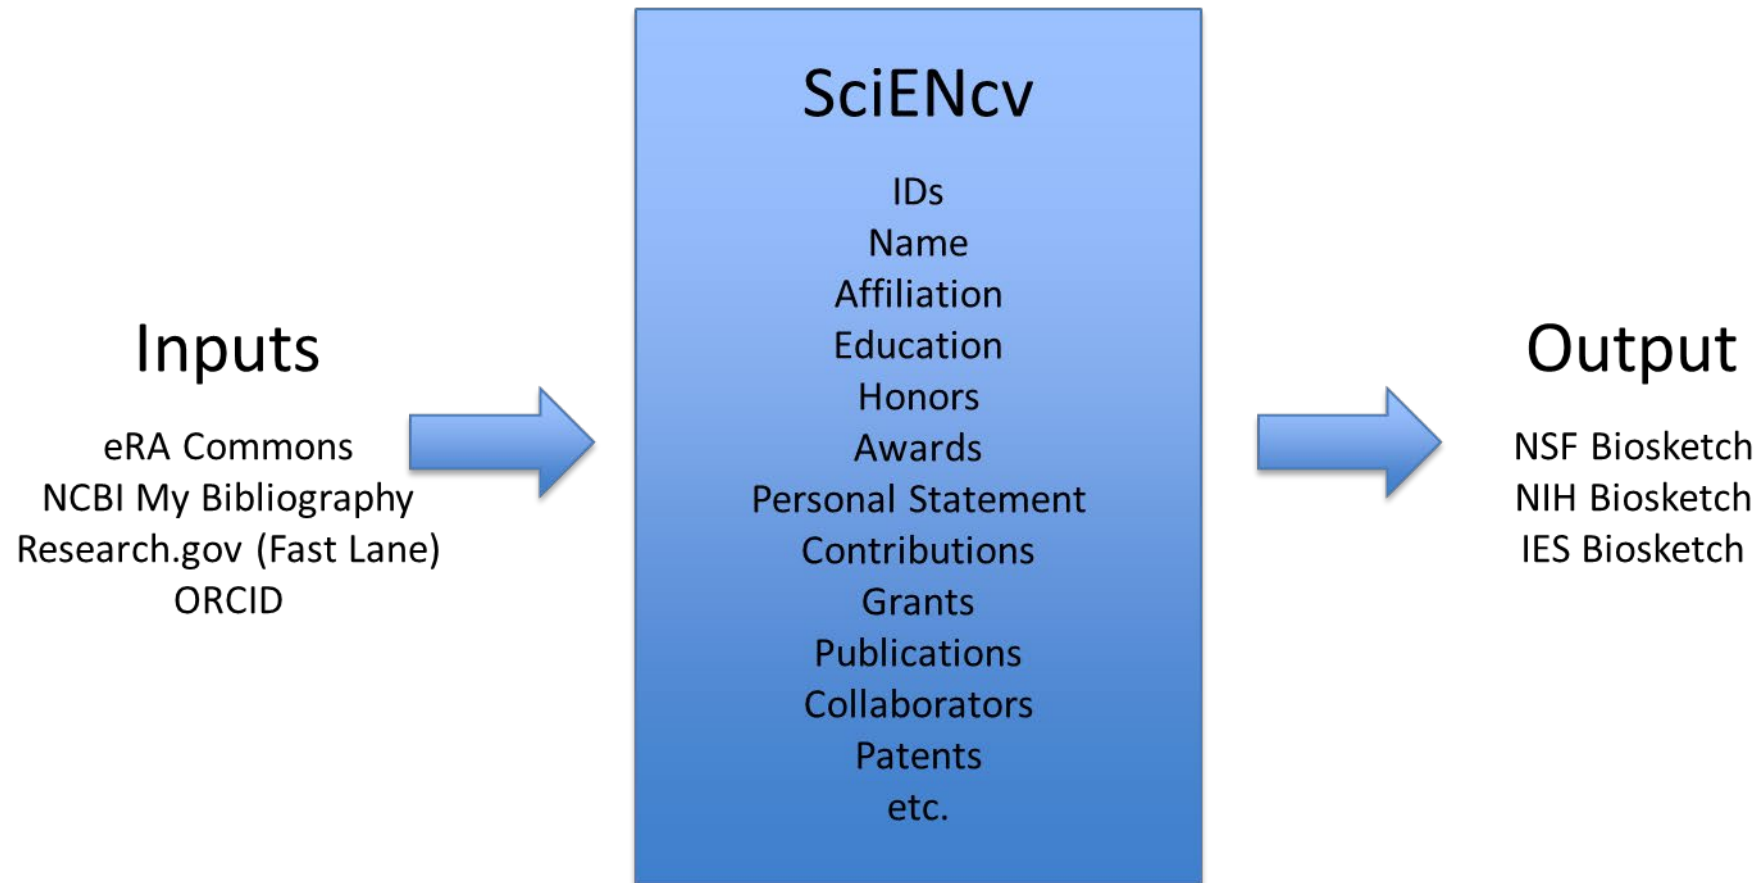

- Effective October 5, 2020, PIs and co-PIs must include an NSF-approved format for Current and Pending Support when **notifying NSF that active other support has changed since the award was made, or since the most recent annual report.**

SciENcv and Fillable Forms

SciENCv

- Science Experts Network Curriculum Vitae = SciENCv
- Created and maintained by NIH for biosketch generation
 - Part of an interagency workgroup including DoE, DOE, EPA, NSF, and USDA
- 1 of the 2 acceptable formats for biosketch and current and pending documents by NSF as of October 5, 2020
- <https://www.ncbi.nlm.nih.gov/sciencv>

What does SciENCv do?

SciENCv Benefits

- Reduces the administrative burden
- Eliminates repeatedly entering biosketch information
- Any researcher may register
- Leverages data from existing systems
- Researcher
 - controls what data are public
 - edits and maintains information
 - provides own data to describe research outcomes
 - has ultimate control over data in biosketch

Resources

Login with multiple options – NSF ID recommended. Can also use eRA Commons, ORCiD ID, Google or NCBI account

The screenshot displays the NCBI login interface. At the top, there is a navigation bar with 'NCBI', 'Resources', and 'How To' links, along with a 'Sign in to NCBI' button. The main content area is divided into two sections. The left section, titled 'Sign in to NCBI', features buttons for 'eRA Commons login' and 'NSF login', a link to 'See more 3rd party sign in options', an 'OR' separator, an 'NCBI Login' button, and a link for 'Need help signing in?'. The right section, titled 'One login and you are in.', provides instructions on using eRA Commons information in SciENcv. It includes a numbered list: 1. 'Sign in with your eRA Commons account.' with a visual of the eRA Commons sign-in process, and 2. 'Link it to your NCBI account or create one.' with radio button options to 'Create a new NCBI account' or 'Link an existing NCBI account', and a 'Continue' button.

Current and Pending Support Summary

PROJECT/PROPOSAL INFORMATION

Current and Pending Support includes all resources made available to an individual in support of and/or related to all of his/her research efforts, regardless of whether or not they have monetary value. [1] Information must be provided about all current and pending support, including this project, for ongoing projects, and for any proposals currently under consideration from whatever source [2], irrespective of whether such support is provided through the proposing organization or is provided directly to the individual. Concurrent submission of a proposal to other organizations will not prejudice its review by NSF, if disclosed.[3]

[1]If the time commitment or dollar value is not readily ascertainable, reasonable estimates should be provided.

[2]For example, Federal, State, local, foreign, public or private foundations, non-profits, industrial or other commercial organizations or internal funds allocated toward specific projects.

[3]The Biological Sciences Directorate exception to this policy is delineated in PAPPG Chapter II.D.2.

[3]The Biological Sciences Directorate exception to this policy is delineated in PAPPG Chapter II.D.2.

IN-KIND CONTRIBUTION INFORMATION

Current and Pending Support also includes in-kind contributions (such as office/laboratory space, equipment, supplies, employees, students). If the in-kind contributions are intended for use on the project being proposed to NSF, the information must be included as part of the Facilities, Equipment and Other Resources section of the proposal and need not be replicated in the individual's Current and Pending Support submission. In-kind contributions not intended for use on the project/proposal being proposed that have associated time obligations must be reported below. If the time commitment or dollar value is not readily ascertainable, reasonable estimates should be provided.
